tamagossi.dev

Bandung, Indonesia (GMT+7)

PROFESSIONAL SUMMARY

Product Engineer (frontend-first) with 7+ years of progressive engineering experience across React, Next.js, TypeScript, and Node.js. Currently Chapter Lead at Indonesia's largest digital staffing platform (1.5M+ workers), leading a 3-person front-end team while coordinating cross-functional squads of FE, backend, QA, and mobile engineers. Proven track record: 60% build time reduction, design systems built from scratch, domain-driven design migrations, and AI-powered features shipped via OpenAI and REST API integration. Seeking a remote Front-End or Full-Stack engineering role with a global team; open to relocation to Malaysia or the Middle East.

CORE COMPETENCIES

Product Engineering

Frontend Architecture

Remote Collaboration

EXPERIENCE

Staffinc Group

May 2024 - Present

Front-End Chapter Lead | Bandung, Indonesia

- Reduced build time by 60% (15+ to 6 mins) via Next.js migration and code standards across the 3-person front-end team.
- Cut bug rate from 100%+ to 70% by improving PR review and code quality standards, fostering ownership over blame.
- Coordinate cross-functional squads of 1 FE, 2 BE, 2 QA, and 1-2 mobile engineers per sprint as squad lead.
- Led domain-driven design migration, created front-end KPIs, and managed stakeholder expectations via 1-on-1s.

Tribe Fintech

Jun 2023 - Mar 2025

Software Engineer (Part-time) | Remote, Indonesia

- Designed AI-powered tools for SMEs using the OpenAI API and Travily API, opening a new business channel for the fintech platform.
- Refactored legacy code to domain-driven design and established coding rules, replacing code that was difficult to navigate and debug.

Edulab Indonesia

Aug 2025 - Jul 2026

Front-End Engineer (Part-time) | Remote, Indonesia

- Optimized website performance by reducing network calls from 3-5 to 1-2 per page and eliminating unnecessary renders.
- Accelerated development by creating a consistent design system and refactoring the codebase for maintainability.

Staffinc Group

Apr 2020 - May 2024

Front-End Software Engineer | Bandung, Indonesia

- Accelerated velocity by creating a design system and monorepo architecture reused across recruitment and admin portals.
- Migrated Client Portal from atomic to domain-driven design, reducing unoptimized code and enabling faster hot reload.
- Achieved 72% test coverage by initiating unit testing across projects from scratch.

Kampus Merdeka

Aug 2022 - Mar 2023

Front-End Engineer | Remote, Indonesia

- Delivered 3 applications from scratch (SIKMA PEMETAAN, SIKMA PENCAIRAN, PRAKTISI MENGAJAR) using React, improving UX and accessibility.

99Group (99.co, Rumah123, SRX)

Feb 2022 - Apr 2022

Software Engineer (Part-time) | Remote, Singapore

- **Built reusable React components** used across multiple platforms, overcoming Docker/M1 incompatibility via remote server development.

PT. Smooets Technology Outsourcing

Jul 2019 - Mar 2020

Technical Leader | Bandung, Indonesia

- **Mentored 3 fresh graduates to productivity in 3 months** while leading 3 teams across 4 front-end and back-end projects using Angular, React, and Node.js.
- **Spanned UI and API work end-to-end**; one mentee now works as a direct report.

PT. Smooets Technology Outsourcing

Oct 2018 - Jun 2019

Front-End Developer | Bandung, Indonesia

- **Digitized a plantation management system** for PT SMART Tbk (Sinar Mas Group), transforming an Excel workflow into an Angular application.

EDUCATION

Associate Degree in Informatic Engineering

2015 - 2018

Bandung State Polytechnic, Indonesia

SKILLS

Frontend (deep): React, Next.js, TypeScript, Vue, Nuxt, React Native, Flutter, TailwindCSS

Backend & API (breadth): Node.js, Golang, PostgreSQL, REST APIs, OpenAI API

Tooling: Git, Docker, Monorepo (Turborepo/Nx), Playwright **Practices:** TDD, DDD, Design Systems, PR Review, Mentoring
